- (8) **Development Permits:** Detached Accessory Dwellings Units are subject to Development Permit requirements under Development Permit Areas No.1 Natural Environment, DPA No.3 Enhanced Design Control Residential, DPA No.7 Energy Conservation & Greenhouse Gas Reduction and DPA No.8 Water Conservation. For greater certainty, existing exemptions were contemplated before Detached Accessory Dwelling Units were created as a distinct land use, and therefore no exemptions apply for Detached Accessory Dwellings Units.
- (9) **Development Permit Design Guidelines:** The following guidelines apply to DADUs in the RS-5, RS-6 and RD-4 Zones, to supplement the guidelines identified in the Official Community Plan for Development Permit Areas No.1 Natural Environment, DPA No.3 Enhanced Design Control Residential, DPA No.7 Energy Conservation & Greenhouse Gas Reduction and DPA No.8 Water Conservation:
- (a) The entrance to the Detached Accessory Dwelling Unit shall be oriented to and visible from the street, well-lit and provide protection from the elements by either a projecting roof or by recessing the front door.
  - (b) On corner lots and laneways, the primary entry to the Detached Accessory Dwelling Unit should be oriented to the side street or laneway, rather than the front lot line. If this orientation is not possible, the entryway should face the interior of the lot rather than the exterior.
  - (c) A minimum 1.2 m wide, unobstructed pathway shall be provided to the front door of the Detached Accessory Dwelling Unit from the street; for certainty, this cannot also be a driveway.
  - (d) The Detached Accessory Dwelling Unit shall be provided with a garbage / recycling collection bin storage area onsite, screened from the view of pedestrians on the street.
  - (e) The Detached Accessory Dwelling Unit shall be provided with a bicycle storage area, onsite, screened from the view of pedestrians on the street.
  - (f) Windows oriented towards adjacent properties are discouraged, unless it can be demonstrated that overlook is mitigated by a design or natural feature.
  - (g) Roof decks and balconies on the roof are not permitted.

- (h) Siting should respect mature trees both on-site and on adjacent properties by locating the Detached Accessory Dwelling Unit to minimize the impact on a tree's root system. A certified arborist report may be required as part of the application.
- (i) On sloping sites, the scale, mass and location of the Detached Accessory Dwelling Unit should adapt to the topography and natural features. The view from adjacent properties should be considered in the design of the Detached Accessory Dwelling Unit.
- (j) Hydro utility meters and mechanical systems should not be placed on the front façade of a building and, if placed in a manner which is visible from the street, will be appropriately screened by the owner in a manner consistent with BC Hydro requirements.
- (k) Exterior side yards on corner lots should be designed and treated as the main entrance to the Detached Accessory Dwelling Unit. Screening and landscaping between the street and outdoor space should be used to define the transition from public to private space.
- (l) Designs which incorporate as many of the green building features outlined on the Green Building Checklist as possible are encouraged.
- (m) Where dormers are used to provide interior room height, the exterior face of the dormer should be set back a minimum of 0.6 m from the exterior wall edge, and 1.2 metres from projecting roof eaves.
